Advanced: Javascript, Angular, MySQL, PHP, Laravel
English level intermediate

Experiencia

MK Medios de Comunicación 2016 - 2021	• International trade operations, developing a system for the control and follow-up of customs operations, feeding the system with operations carried out for future operations.
Freelancer 2019 - Actual	• Development of web sites and web applications for small and medium companies, for the control of inputs, outputs, inventories and purchases. • Implementation of dashboard to track operations, filtered by day, week, month and even year, adding reporting and graphs for decision making in processes.
Tsastún 2021 - Actual	• Database migration from MariaBD to Oracle, due to exponential growth in records and long query times, improving performance and end-user interaction. Systems for updating customer data which were submitted to the office, to which the solution was given to upload data and documents through the use of a computer accessing a website that facilitated the procedure from 10 days to a maximum of 2 days. • Customers who visited offices to deliver information and documents in order to receive a payment, a system that helped the customer to upload these requirements from a device and the management of the requirements through an executive, increasing the number of requests attended and improving processing times from 14 days to a maximum of 3 days.
